

Upcoming MissionLakes Webinar: Turning Pollution into Resources

We invite you to join the **3rd Mission Lakes Webinar Series**, a joint online event bringing together four EU-funded sister projects ([Ferro](#), [EuroLakes](#), [ProCleanLakes](#), FutureLakes) to explore how lake-related pollution can be transformed into valuable resources through **circular, nature-based solutions**.

FutureLakes will be represented by **Dr. Margarida Costa** from the Norwegian Institute for Water Research (NIVA), who will talk about developing circular economies from algal biomass, highlighting the collaborative link between FutureLakes and the Mission Ocean and Waters [LOCALITY](#) project for evaluating innovative technologies for harvesting cyanobacterial biomass for recovery of high value compounds.

Hope to see you there!
